SYNOPSIS

Our Clinical Residencies are typically for much smaller groups of participants with a lot more focus on the daily work of the clinic rather than on lectures and pure training programs. The participant can observe surgeries or other treatments, or follow the surgical procedures via live streaming. The program may include the MALO CLINIC Protocol (All-on-4[®] surgical protocol + MALO CLINIC Bridge), immediate function single and partial, and fixed prosthodontics, as well as other procedures of the various specialties of dentistry.

We share with you theoretical information not only concerning the All-on-4[®] surgical protocol but also Considerations on Imaging, NobelGuide[®] and MALO CLINIC Bridge.

MALO CLINIC NUFFIELD DENTAL

BASIC COURSE OUTLINE

Lecturers: Dr. Samintharaj Kumar and the MALO CLINIC Singapore Clinic Team

DAY 1

TIME	SURGERY	LECTURES
